EDUCATION

Parsity

Certificate in Full Stack

Software Engineering

June 2021

SUMMARY

I'm a developer transitioning from firefighting with experience working both alone and on teams on a variety of software projects. First responding has given me a proven ability to maintain focus in situations of any stress level with meticulous attention to detail, and shaped me into an adaptive and responsive learner.

EXPERIENCE

Software Engineering Student — Parsity // March - June 2021

- 750+ hours of practical coding experience and creating full stack web applications.
- Understanding of computer science fundamentals, software lifecycle, MVC data flow.
- *Capstone Projects:*

Mentor Matchr (Independent Project)

- A continuously deployed MERN web app for encouraging software mentorship. Features include integration with stripe, an admin dashboard (e.g. create custom site-wide TTL banners), image upload, drag and drop, user chat and a collaborative text editor for pair-programming, created in under two weeks.
- Stripe, Socket.IO, Material-UI, Passport.js, React/Redux, HTML/CSS/JS, Node, Express, MongoDB Cloud Atlas, Mongoose, Heroku, and more.

Closr (Frontend Lead)

- As Frontend Lead, I worked collaboratively with 6 classmates for 2 weeks to create a client relationship management app.
- Users can add companies, generate deals, manage and track deal status and view metrics on a dashboard.
- Developed with agile methodologies using React/Redux, HTML/CSS/JS, Node, Express, MongoDB, and Mongoose.

Firefighter EMT-B — DC Fire and EMS // Jan 2019 - Present

- Fire suppression and emergency response at one of the busiest firehouses in the country.

Formalities Specialist — Oblon et al. LLP // 2016 - 2018

- Processing, preparation, and proofreading of Patent Applications and Information Disclosure Statements with the US Patent and Trademark Office with adherence to complex rules and procedures per client and firm specifications.
